

Tier 1 and Tier 2 For-Profit Entities

New Accounting Standards effective from 1 July 2020

Last updated: 11 February 2022

When preparing financial statements in accordance with accounting standards issued by External Reporting Board (XRB), it is important for for-profit entities to consider the impact of new accounting standards issued.

Directors, preparers and auditors are encouraged to consider as early as possible the impact of applying new accounting standards.

This publication will assist Tier 1 and Tier 2 for-profit entity's when:

- (a) identifying new accounting standards impacting the preparation of annual financial statements for the first time in the current year; and
- (b) disclosing information about new accounting standards that have been issued but are not yet effective (disclosure only required by Tier 1 entities).¹

Entities must apply professional judgment in determining the impact of new accounting standards, including their relevance to the entity's activities.

The table on the next page provides a checklist of the new accounting standards issued by the XRB as of February 2022, which require first-time application by for-profit entities with a 30 June 2021 year-end or subsequent annual reporting date. Each new standard listed has a link to the full final pronouncement on our website.

New Accounting Standards

The [table](#) on the next page provides a list of all new for-profit accounting standards issued by the XRB as of February 2022 and which are effective for annual reporting periods beginning on or after 1 July 2020, and standards that are effective in subsequent annual reporting periods.

In other words, the list includes all new accounting standards that will require application for the first time by for-profit entities with a year-end (balance date) of 30 June 2021 or subsequent annual reporting date.

Explanatory video

Please refer to the following explanatory video for further information on the effective dates of accounting standards — [What is the effective date for an accounting standard and how does it apply to your reporting entity? What does early adoption mean?](#)

² The Standard shall be applied for annual reporting periods beginning on or after the effective date (except if otherwise noted). For example, if an entity has a 31 December balance date, its annual reporting period begins 1 January.

³ The Standard is effective for annual periods ending on or after 30 September 2020.

⁴ This exemption applies only to certain insurers that meet specific criteria.

⁵ The original effective date was 1 January 2021, but in August 2020 it was deferred to 1 January 2023, by the amending standard *Amendments to NZ IFRS 17*.

⁶ The effective date was originally 1 January 2022, but was deferred to 1 January 2023 in August 2020. See *Classification of Liabilities as Current or Non-current – Deferral of Effective Date*.

⁷ The original effective date of this amending standard was 1 January 2016. However, the IASB deferred the effective date of the equivalent amendments indefinitely. In New Zealand, all accounting standards and amendments must have an effective date. Therefore, in New Zealand, the effective date of these amendments is currently deferred to 1 January 2025.
