

NZ IFRIC 1 (Diff Rep)

**NZ IFRIC Interpretation 1 (Diff Rep)**

**Changes in Existing Decommissioning, Restoration and Similar Liabilities (NZ IFRIC 1 (Diff Rep))**

**Issued November 2012**

This Interpretation was issued by the New Zealand Accounting Standards Board of the External Reporting Board pursuant to section 24(1)(a) of the Financial Reporting Act 1993.

This Interpretation is a Regulation for the purposes of the Regulations (Disallowance) Act 1989.

As at 1 December 2012, the requirements in this Interpretation are identical to the requirements in NZ IFRIC 1 *Changes in Existing Decommissioning, Restoration and Similar Liabilities* as applied by qualifying entities. Versions of NZ IFRIC 1 applied by qualifying entities prior to adoption of this Interpretation are available in the Archived Standards page of the External Reporting Board (XRB) website at [xrb.govt.nz](http://xrb.govt.nz)

## NZ IFRIC 1 (Diff Rep)

NZ IFRIC Interpretation 1 (Diff Rep) *Changes in Existing Decommissioning, Restoration and Similar Liabilities* (NZ IFRIC 1 (Diff Rep)) is set out in paragraphs 1–10.

NZ IFRIC 1 (Diff Rep) should be read in the context of the IFRIC’s Basis for Conclusions on IFRIC 1 and the Illustrative Examples for IFRIC 1.

Any additional material is shown with grey shading and the paragraphs are denoted with “NZ”.

### **Differential Reporting**

Qualifying entities must comply with all the provisions in NZ IFRIC 1 (Diff Rep).

NZ IFRIC 1 (Diff Rep) is identical to NZ IFRIC 1 applied by qualifying entities prior to the issuance of NZ IFRIC 1 (Diff Rep). That is, there is no change to the recognition, measurement, presentation and disclosure requirements of NZ IFRIC 1 on adoption of this Interpretation.

#### **Background**

---

- 1 Many entities have obligations to dismantle, remove and restore items of property, plant and equipment. In this Interpretation such obligations are referred to as 'decommissioning, restoration and similar liabilities'. Under NZ IAS 16 (Diff Rep), the cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period. NZ IAS 37 (Diff Rep) contains requirements on how to measure decommissioning, restoration and similar liabilities. This Interpretation provides guidance on how to account for the effect of changes in the measurement of existing decommissioning, restoration and similar liabilities.

## Scope

---

NZ 1.1 This Interpretation applies only to Tier 3 for-profit entities.

- 2 This Interpretation applies to changes in the measurement of any existing decommissioning, restoration or similar liability that is both:
- (a) recognised as part of the cost of an item of property, plant and equipment in accordance with NZ IAS 16 (Diff Rep); and
  - (b) recognised as a liability in accordance with NZ IAS 37 (Diff Rep).
- For example, a decommissioning, restoration or similar liability may exist for decommissioning a plant, rehabilitating environmental damage in extractive industries, or removing equipment.

## Issue

---

- 3 This Interpretation addresses how the effect of the following events that change the measurement of an existing decommissioning, restoration or similar liability should be accounted for:
- (a) a change in the estimated outflow of resources embodying economic benefits (eg cash flows) required to settle the obligation;
  - (b) a change in the current market-based discount rate as defined in paragraph 47 of NZ IAS 37 (Diff Rep) (this includes changes in the time value of money and the risks specific to the liability); and
  - (c) an increase that reflects the passage of time (also referred to as the unwinding of the discount).

## Consensus

---

- 4 Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits required to settle the obligation, or a change in the discount rate, shall be accounted for in accordance with paragraphs 5–7 below.
- 5 If the related asset is measured using the cost model:
- (a) subject to (b), changes in the liability shall be added to, or deducted from, the cost of the related asset in the current period.
  - (b) the amount deducted from the cost of the asset shall not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess shall be recognised immediately in profit or loss.

## NZ IFRIC 1 (Diff Rep)

- (c) if the adjustment results in an addition to the cost of an asset, the entity shall consider whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the entity shall test the asset for impairment by estimating its recoverable amount, and shall account for any impairment loss, in accordance with NZ IAS 36 (Diff Rep).
- 6 If the related asset is measured using the revaluation model:
- (a) changes in the liability alter the revaluation surplus or deficit previously recognised on that asset, so that:
    - (i) a decrease in the liability shall (subject to (b)) be recognised in other comprehensive income and increase the revaluation surplus within equity, except that it shall be recognised in profit or loss to the extent that it reverses a revaluation deficit on the asset that was previously recognised in profit or loss;
    - (ii) an increase in the liability shall be recognised in profit or loss, except that it shall be recognised in other comprehensive income and reduce the revaluation surplus within equity to the extent of any credit balance existing in the revaluation surplus in respect of that asset.
  - (b) in the event that a decrease in the liability exceeds the carrying amount that would have been recognised had the asset been carried under the cost model, the excess shall be recognised immediately in profit or loss.
  - (c) a change in the liability is an indication that the asset may have to be revalued in order to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period. Any such revaluation shall be taken into account in determining the amounts to be recognised in profit or loss or in other comprehensive income under (a). If a revaluation is necessary, all assets of that class shall be revalued.
  - (d) NZ IAS 1 (Diff Rep) requires disclosure in the statement of comprehensive income of each component of other comprehensive income or expense. In complying with this requirement, the change in the revaluation surplus arising from a change in the liability shall be separately identified and disclosed as such.
- 7 The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability shall be recognised in profit or loss as they occur. This applies under both the cost model and the revaluation model.
- 8 The periodic unwinding of the discount shall be recognised in profit or loss as a finance cost as it occurs. Capitalisation under NZ IAS 23 (Diff Rep) is not permitted.

## NZ IFRIC 1 (Diff Rep)

### Effective date

---

9–9A [Deleted]

NZ 9.1	A Tier 3 for-profit entity shall apply this Interpretation for annual periods beginning on or after 1 December 2012. Early application is permitted. This Interpretation replaces NZ IFRIC 1 as applied by qualifying entities prior to the issuance of this Interpretation. There are no changes to the requirements of NZ IFRIC 1 as it applied to qualifying entities.
--------	---

### Transition

---

10 [Paragraph 10 is not reproduced as the transitional provision of IFRIC 1 is not relevant to this Interpretation.]
