

## NZ IAS 20 (PBE)

NZ ACCOUNTING  
STANDARDS  
BOARD

### **NZ International Accounting Standard 20 (PBE) Accounting for Government Grants and Disclosure of Government Assistance (NZ IAS 20 (PBE))**

**Issued November 2012 excluding consequential amendments resulting from early adoption of NZ IFRS 9 (2010) (PBE) *Financial Instruments***

This Standard was issued by the New Zealand Accounting Standards Board of the External Reporting Board pursuant to section 24(1)(a) of the Financial Reporting Act 1993.

This Standard is a Regulation for the purposes of the Regulations (Disallowance) Act 1989.

As at 1 December 2012, the requirements in this Standard are identical to the requirements in NZ IAS 20 *Accounting for Government Grants and Disclosure of Government Assistance* as applied by public benefit entities. Versions of NZ IAS 20 applied by public benefit entities prior to adoption of this Standard are available on the Archived Standards page of the External Reporting Board (XRB) website at [xrb.govt.nz](http://xrb.govt.nz)

The following New Zealand Interpretations relates to NZ IAS 20 (PBE):

- NZ SIC-10 (PBE) *Government Assistance—No Specific Relation to Operating Activities*
- NZ IFRIC 12 (PBE) *Service Concession Arrangements*
- NZ IFRIC 18 (PBE) *Transfers of Assets from Customers*

## NZ IAS 20 (PBE)

---

NZ International Accounting Standard 20 (PBE) *Accounting for Government Grants and Disclosure of Government Assistance* (NZ IAS 20 (PBE)) is set out in paragraphs NZ 0.1–NZ 44.2. NZ IAS 20 (PBE) is based on International Accounting Standard 20 *Accounting for Government Grants and Disclosure of Government Assistance* (IAS 20) (reformatted 1994) issued by the International Accounting Standards Committee (IASC) and adopted by the International Accounting Standards Board (IASB). All the paragraphs have equal authority but retain the IASC format of the Standard when it was adopted by the IASB. NZ IAS 20 (PBE) should be read in the context of the IASB’s Basis for Conclusions on IAS 20 and Part B of the New Zealand *Conceptual Framework for Financial Reporting* (NZ Framework). NZ IAS 8 (PBE) *Accounting Policies, Changes in Accounting Estimates and Errors* provides a basis for selecting and applying accounting policies in the absence of explicit guidance.

Any additional material is shown with grey shading. The paragraphs are denoted with “NZ” and identify the types of entities to which the paragraphs apply.

This Standard uses the terminology adopted in International Financial Reporting Standards (IFRSs) to describe the financial statements and other elements. NZ IAS 1 (PBE) *Presentation of Financial Statements* paragraph 5 explains that entities other than profit-oriented entities seeking to apply the Standard may need to amend the descriptions used for particular line items in the financial statements and for the financial statements themselves. For example, profit/loss may be referred to as surplus/deficit and capital or share capital may be referred to as equity.

## Introduction to NZ IAS 20 (PBE)

NZ IAS 20 (PBE) is identical to NZ IAS 20 applied by public benefit entities prior to the issuance of NZ IAS 20 (PBE). That is, there are no changes to the recognition, measurement, presentation and disclosure requirements of NZ IAS 20 on adoption of this Standard.

The Standard prescribes the accounting for, and disclosure of, government grants and the disclosure of other forms of government assistance.

In adopting IAS 20 for application as NZ IAS 20 (PBE) application of the Standard by public benefit entities is limited to the disclosure requirements in paragraph 39.

When IAS 20 was introduced to New Zealand for public benefit entities application of IAS 20 was restricted for the following reasons:

- (a) government grants are a fundamental component of the financial statements of many public benefit entities. The treatment of government grants is likely to have a material impact on the financial statements of public benefit entities; and
- (b) application of the measurement and recognition requirements in the Standard could result in the assets and equity of public benefit entities being materially understated, particularly in the case of capital grants.

### Differential reporting

Qualifying entities must comply with all the provisions in NZ IAS 20 (PBE).

# **NZ International Accounting Standard 20 (PBE)**

## ***Accounting for Government Grants and Disclosure of Government Assistance (NZ IAS 20)***

### **Scope**

---

**NZ 0.1 This Standard applies only to public benefit entities.**

**1 This Standard shall be applied in accounting for, and in the disclosure of, government grants and in the disclosure of other forms of government assistance.**

#### **Public Benefit Entities**

**NZ 1.1 Public benefit entities shall not apply the recognition, measurement and presentation requirements set out in paragraphs 7 to 33 of this Standard. Public benefit entities shall apply the disclosure requirements in paragraph 39.**

**2 This Standard does not deal with:**

- (a) the special problems arising in accounting for government grants in financial statements reflecting the effects of changing prices or in supplementary information of a similar nature.
- (b) government assistance that is provided for an entity in the form of benefits that are available in determining taxable profit or tax loss or are determined or limited on the basis of income tax liability. Examples of such benefits are income tax holidays, investment tax credits, accelerated depreciation allowances and reduced income tax rates.
- (c) government participation in the ownership of the entity.
- (d) government grants covered by NZ IAS 41 (PBE) *Agriculture*.

### **Definitions**

---

**3 The following terms are used in this Standard with the meanings specified:**  
***Government* refers to government, government agencies and similar bodies whether local, national or international.**

## NZ IAS 20 (PBE)

**Government assistance** is action by government designed to provide an economic benefit specific to an entity or range of entities qualifying under certain criteria. Government assistance for the purpose of this Standard does not include benefits provided only indirectly through action affecting general trading conditions, such as the provision of infrastructure in development areas or the imposition of trading constraints on competitors.

**Government grants** are assistance by government in the form of transfers of resources to an entity in return for past or future compliance with certain conditions relating to the operating activities of the entity. They exclude those forms of government assistance which cannot reasonably have a value placed upon them and transactions with government which cannot be distinguished from the normal trading transactions of the entity.\*

**Grants related to assets** are government grants whose primary condition is that an entity qualifying for them should purchase, construct or otherwise acquire long-term assets. Subsidiary conditions may also be attached restricting the type or location of the assets or the periods during which they are to be acquired or held.

**Grants related to income** are government grants other than those related to assets.

**Forgivable loans** are loans which the lender undertakes to waive repayment of under certain prescribed conditions.

**Fair value** is the amount for which an asset could be exchanged between a knowledgeable, willing buyer and a knowledgeable, willing seller in an arm's length transaction.

### Public Benefit Entities

**NZ 3.1** The following term is used in this Standard with the meaning specified:

**Public benefit entities** are reporting entities whose primary objective is to provide goods or services for community or social benefit and where any equity has been provided with a view to supporting that primary objective rather than for a financial return to equity holders.

- 4 Government assistance takes many forms varying both in the nature of the assistance given and in the conditions which are usually attached to it. The purpose of the assistance may be to encourage an entity to embark on a course of action which it would not normally have taken if the assistance was not provided.
- 5 The receipt of government assistance by an entity may be significant for the preparation of the financial statements for two reasons. Firstly, if resources have been transferred, an appropriate method of accounting for the transfer must be found. Secondly, it is desirable to give an indication of the extent to which the

---

\* See also NZ SIC-10 (PBE) *Government Assistance—No Specific Relation to Operating Activities*.

## NZ IAS 20 (PBE)

entity has benefited from such assistance during the reporting period. This facilitates comparison of an entity's financial statements with those of prior periods and with those of other entities.

- 6 Government grants are sometimes called by other names such as subsidies, subventions, or premiums.

### **Government grants**

---

- 7 **Government grants, including non-monetary grants at fair value, shall not be recognised until there is reasonable assurance that:**

- (a) **the entity will comply with the conditions attaching to them; and**
- (b) **the grants will be received.**

- 8 A government grant is not recognised until there is reasonable assurance that the entity will comply with the conditions attaching to it, and that the grant will be received. Receipt of a grant does not of itself provide conclusive evidence that the conditions attaching to the grant have been or will be fulfilled.

- 9 The manner in which a grant is received does not affect the accounting method to be adopted in regard to the grant. Thus a grant is accounted for in the same manner whether it is received in cash or as a reduction of a liability to the government.

- 10 A forgivable loan from government is treated as a government grant when there is reasonable assurance that the entity will meet the terms for forgiveness of the loan.

- 10A The benefit of a government loan at a below-market rate of interest is treated as a government grant. The loan shall be recognised and measured in accordance with NZ IAS 39 (PBE) *Financial Instruments: Recognition and Measurement*. The benefit of the below-market rate of interest shall be measured as the difference between the initial carrying value of the loan determined in accordance with NZ IAS 39 (PBE) and the proceeds received. The benefit is accounted for in accordance with this Standard. The entity shall consider the conditions and obligations that have been, or must be, met when identifying the costs for which the benefit of the loan is intended to compensate.

- 11 Once a government grant is recognised, any related contingent liability or contingent asset is treated in accordance with NZ IAS 37 (PBE) *Provisions, Contingent Liabilities and Contingent Assets*.

- 12 **Government grants shall be recognised in profit or loss on a systematic basis over the periods in which the entity recognises as expenses the related costs for which the grants are intended to compensate. They shall not be credited directly to shareholders' interests.**

- 13 There are two broad approaches to the accounting for government grants: the capital approach, under which a grant is recognised outside profit or loss, and the

## NZ IAS 20 (PBE)

income approach, under which a grant is recognised in profit or loss over one or more periods.

- 14 Those in support of the capital approach argue as follows:
- (a) government grants are a financing device and should be dealt with as such in the statement of financial position rather than be recognised in profit or loss to offset the items of expense that they finance. Because no repayment is expected, such grants should be recognised outside profit or loss; and
  - (b) it is inappropriate to recognise government grants in profit or loss, because they are not earned but represent an incentive provided by government without related costs.
- 15 Arguments in support of the income approach are as follows:
- (a) because government grants are receipts from a source other than shareholders, they should not be recognised directly in equity but should be recognised in profit or loss in appropriate periods.
  - (b) government grants are rarely gratuitous. The entity earns them through compliance with their conditions and meeting the envisaged obligations. They should therefore be recognised in profit or loss over the periods in which the entity recognises as expenses the related costs for which the grant is intended to compensate.
  - (c) because income and other taxes are expenses, it is logical to deal also with government grants, which are an extension of fiscal policies, in profit or loss.
- 16 It is fundamental to the income approach that government grants should be recognised in profit or loss on a systematic basis over the periods in which the entity recognises as expenses the related costs for which the grant is intended to compensate. Recognition of government grants in profit or loss on a receipts basis is not in accordance with the accrual accounting assumption (see NZ IAS 1 (PBE) *Presentation of Financial Statements*) and would be acceptable only if no basis existed for allocating a grant to periods other than the one in which it was received.
- 17 In most cases the periods over which an entity recognises the costs or expenses related to a government grant are readily ascertainable. Thus grants in recognition of specific expenses are recognised in profit or loss in the same period as the relevant expenses. Similarly, grants related to depreciable assets are usually recognised in profit or loss over the periods and in the proportions in which depreciation expense on those assets is recognised.
- 18 Grants related to non-depreciable assets may also require the fulfilment of certain obligations and would then be recognised in profit or loss over the periods that bear the cost of meeting the obligations. As an example, a grant of land may be conditional upon the erection of a building on the site and it may be appropriate to recognise the grant in profit or loss over the life of the building.

## NZ IAS 20 (PBE)

- 19 Grants are sometimes received as part of a package of financial or fiscal aids to which a number of conditions are attached. In such cases, care is needed in identifying the conditions giving rise to costs and expenses which determine the periods over which the grant will be earned. It may be appropriate to allocate part of a grant on one basis and part on another.
- 20 **A government grant that becomes receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the entity with no future related costs shall be recognised in profit or loss of the period in which it becomes receivable.**
- 21 In some circumstances, a government grant may be awarded for the purpose of giving immediate financial support to an entity rather than as an incentive to undertake specific expenditures. Such grants may be confined to a particular entity and may not be available to a whole class of beneficiaries. These circumstances may warrant recognising a grant in profit or loss of the period in which the entity qualifies to receive it, with disclosure to ensure that its effect is clearly understood.
- 22 A government grant may become receivable by an entity as compensation for expenses or losses incurred in a previous period. Such a grant is recognised in profit or loss of the period in which it becomes receivable, with disclosure to ensure that its effect is clearly understood.

### **Non-monetary government grants**

- 23 A government grant may take the form of a transfer of a non-monetary asset, such as land or other resources, for the use of the entity. In these circumstances it is usual to assess the fair value of the non-monetary asset and to account for both grant and asset at that fair value. An alternative course that is sometimes followed is to record both asset and grant at a nominal amount.

### **Presentation of grants related to assets**

- 24 **Government grants related to assets, including non-monetary grants at fair value, shall be presented in the statement of financial position either by setting up the grant as deferred income or by deducting the grant in arriving at the carrying amount of the asset.**
- 25 Two methods of presentation in financial statements of grants (or the appropriate portions of grants) related to assets are regarded as acceptable alternatives.
- 26 One method recognises the grant as deferred income that is recognised in profit or loss on a systematic basis over the useful life of the asset.
- 27 The other method deducts the grant in calculating the carrying amount of the asset. The grant is recognised in profit or loss over the life of a depreciable asset as a reduced depreciation expense.

## NZ IAS 20 (PBE)

- 28 The purchase of assets and the receipt of related grants can cause major movements in the cash flow of an entity. For this reason and in order to show the gross investment in assets, such movements are often disclosed as separate items in the statement of cash flows regardless of whether or not the grant is deducted from the related asset for presentation purposes in the statement of financial position.

### **Presentation of grants related to income**

- 29 Grants related to income are sometimes presented as a credit in the statement of comprehensive income, either separately or under a general heading such as "Other income"; alternatively, they are deducted in reporting the related expense.
- 29A If an entity presents the components of profit or loss in a separate income statement as described in paragraph 81 of NZ IAS 1 (PBE), it presents grants related to income as required in paragraph 29 in that separate statement.
- 30 Supporters of the first method claim that it is inappropriate to net income and expense items and that separation of the grant from the expense facilitates comparison with other expenses not affected by a grant. For the second method it is argued that the expenses might well not have been incurred by the entity if the grant had not been available and presentation of the expense without offsetting the grant may therefore be misleading.
- 31 Both methods are regarded as acceptable for the presentation of grants related to income. Disclosure of the grant may be necessary for a proper understanding of the financial statements. Disclosure of the effect of the grants on any item of income or expense which is required to be separately disclosed is usually appropriate.

### **Repayment of government grants**

- 32 **A government grant that becomes repayable shall be accounted for as a change in accounting estimate (see NZ IAS 8 (PBE) *Accounting Policies, Changes in Accounting Estimates and Errors*). Repayment of a grant related to income shall be applied first against any unamortised deferred credit recognised in respect of the grant. To the extent that the repayment exceeds any such deferred credit, or when no deferred credit exists, the repayment shall be recognised immediately in profit or loss. Repayment of a grant related to an asset shall be recognised by increasing the carrying amount of the asset or reducing the deferred income balance by the amount repayable. The cumulative additional depreciation that would have been recognised in profit or loss to date in the absence of the grant shall be recognised immediately in profit or loss.**
- 33 Circumstances giving rise to repayment of a grant related to an asset may require consideration to be given to the possible impairment of the new carrying amount of the asset.

## Government assistance

---

- 34 Excluded from the definition of government grants in paragraph 3 are certain forms of government assistance which cannot reasonably have a value placed upon them and transactions with government which cannot be distinguished from the normal trading transactions of the entity.
- 35 Examples of assistance that cannot reasonably have a value placed upon them are free technical or marketing advice and the provision of guarantees. An example of assistance that cannot be distinguished from the normal trading transactions of the entity is a government procurement policy that is responsible for a portion of the entity's sales. The existence of the benefit might be unquestioned but any attempt to segregate the trading activities from government assistance could well be arbitrary.
- 36 The significance of the benefit in the above examples may be such that disclosure of the nature, extent and duration of the assistance is necessary in order that the financial statements may not be misleading.
- 37 [Deleted by IASB]
- 38 In this Standard, government assistance does not include the provision of infrastructure by improvement to the general transport and communication network and the supply of improved facilities such as irrigation or water reticulation which is available on an ongoing indeterminate basis for the benefit of an entire local community.

## Disclosure

---

- 39 **The following matters shall be disclosed:**
- (a) **the accounting policy adopted for government grants, including the methods of presentation adopted in the financial statements;**
  - (b) **the nature and extent of government grants recognised in the financial statements and an indication of other forms of government assistance from which the entity has directly benefited; and**
  - (c) **unfulfilled conditions and other contingencies attaching to government assistance that has been recognised.**

### Profit-Oriented Entities
