

New Zealand Equivalent to International Financial Reporting Standard 1

First-time Adoption of New Zealand Equivalents to International Financial Reporting Standards (NZ IFRS 1)

Issued December 2008 and incorporates amendments up to and including 31 July 2010 other than consequential amendments resulting from early adoption of NZ IFRS 9 *Financial Instruments*

This Standard was issued by the Financial Reporting Standards Board of the New Zealand Institute of Chartered Accountants and approved by the Accounting Standards Review Board in December 2008 under the Financial Reporting Act 1993. This Standard is a Regulation for the purpose of the Regulations (Disallowance) Act 1989.

This Standard, on adoption, supersedes NZ IFRS 1 *First-time Adoption of New Zealand Equivalents to International Financial Reporting Standards* (issued in 2004).

This Standard, on adoption, supersedes those New Zealand Financial Reporting Standards and Statements of Standard Accounting Practice listed in Appendix A of the New Zealand *Preface*.

The following New Zealand Interpretations refer to NZ IFRS 1:

- NZ IFRIC 9 *Embedded Derivatives*
- NZ IFRIC 12 *Service Concession Arrangements*
- NZ IFRIC 18 *Transfers of Assets from Customers*

IASB IMPLEMENTATION GUIDANCE

TABLE OF CONCORDANCE

New Zealand Equivalent to International Financial Reporting Standard 1 *First-time Adoption of New Zealand Equivalents to International Financial Reporting Standards* (NZ IFRS 1) is set out in paragraphs 1–40 and Appendices A–E. NZ IFRS 1 is based on International Financial Reporting Standard 1 *First-time Adoption of International Financial Reporting Standards* (IFRS 1) (2008) published by the International Accounting Standards Board (IASB). All the paragraphs have equal authority. Paragraphs in **bold type** state the main principles. Terms defined in Appendix A are in *italics* the first time they appear in the Standard. Definitions of other terms are given in the Glossary. NZ IFRS 1 should be read in the context of its objective and the IASB’s Basis for Conclusions on IFRS 1 and the New Zealand Equivalent to the IASB *Conceptual Framework for Financial Reporting* (NZ Framework). NZ IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors* provides a basis for selecting and applying accounting policies in the absence of explicit guidance.

Any additional material is shown with grey shading. The paragraphs are denoted with “NZ” and identify the types of entities to which the paragraphs apply.

This Standard uses the terminology adopted in International Financial Reporting Standards (IFRSs) to describe the financial statements and other elements. NZ IAS 1 *Presentation of Financial Statements* (as revised in 2007) paragraph 5 explains that entities other than profit-oriented entities seeking to apply the Standard may need to amend the descriptions used for particular line items in the financial statements and for the financial statements themselves. For example, profit/loss may be referred to as surplus/deficit and capital or share capital may be referred to as equity.

HISTORY OF AMENDMENTS

Table of Pronouncements – NZ IFRS 1 *First-time Adoption of New Zealand Equivalents to International Financial Reporting Standards*

This table lists the pronouncements establishing and substantially amending NZ IFRS 1. The table is based on amendments approved as at 31 July 2010 other than consequential amendments resulting from early adoption of NZ IFRS 9 *Financial Instruments*.

Introduction to NZ IFRS 1

Reasons for issuing the IFRS

- IN1 The International Accounting Standards Board issued IFRS 1 in June 2003. IFRS 1 replaced SIC-8 *First-time Application of IASs as the Primary Basis of Accounting*. The IASB developed the IFRS to address concerns about the full retrospective application of IFRSs required by SIC-8.
- IN2 Subsequently, IFRS 1 was amended many times to accommodate first-time adoption requirements resulting from new or amended IFRSs. As a result, the IFRS became more complex and less clear. In 2007, therefore, the IASB proposed, as part of its annual improvements project, to change IFRS 1 to make it easier for the reader to understand and to design it to better accommodate future changes. The version of IFRS 1 issued in 2008 retains the substance of the previous version, but within a changed structure. It replaces the previous version and is effective for entities applying IFRSs for the first time for annual periods beginning on or after 1 July 2009. Earlier application is permitted.

Main features of the NZ IFRS

- IN3 *New Zealand Equivalent to International Financial Reporting Standard 1* (NZ IFRS 1) is based on IFRS 1 (as revised in 2008). NZ IFRS 1 applies when an entity *adopts New Zealand equivalents to IFRSs* (NZ IFRSs) for the first time by an explicit and unreserved statement of compliance with NZ IFRSs.
- IN4 In general, the NZ IFRS requires an entity to comply with each NZ IFRS effective at the end of its first New Zealand equivalent to IFRSs reporting period. In particular, the NZ IFRS requires an entity to do the following in the opening *New Zealand equivalents to IFRSs statement of financial position* that it prepares as a starting point for its accounting under NZ IFRSs:
- (a) recognise all assets and liabilities whose recognition is required by NZ IFRSs;
 - (b) not recognise items as assets or liabilities if NZ IFRSs do not permit such recognition;
 - (c) reclassify items that it recognised under previous GAAP as one type of asset, liability or component of equity, but are a different type of asset, liability or component of equity under NZ IFRSs; and
 - (d) apply NZ IFRSs in measuring all recognised assets and liabilities.
- IN5 The NZ IFRS grants limited exemptions from these requirements in specified areas where the cost of complying with them would be likely to exceed the benefits to users of financial statements. The NZ IFRS also prohibits retrospective application of NZ IFRSs in some areas, particularly where retrospective

NZ IFRS 1

application would require judgments by management about past conditions after the outcome of a particular transaction is already known.

- IN6 The NZ IFRS requires disclosures that explain how the transition from previous GAAP to NZ IFRSs affected the entity's reported financial position, financial performance and cash flows.
- IN7 An entity is required to apply the NZ IFRS if its first New Zealand equivalents to IFRSs financial statements are for a period beginning on or after 1 July 2009. Earlier application is encouraged.

New Zealand specific changes

Public benefit entities

- IN8 In adopting IFRS 1 for application as NZ IFRS 1, an additional definition specific to public benefit entities has been added to Appendix A.

Qualifying entities

- IN9 NZ IFRS 1 defines qualifying entities (Appendix A). Entities which qualify for differential reporting concessions in accordance with the *Framework for Differential Reporting for Entities Applying the New Zealand Equivalents to International Financial Reporting Standards Reporting Regime* (2005) are not required to provide a statement of financial position as at the beginning of the earliest comparative period in accordance with paragraph 21.

Compliance with IFRS 1

- IN10 Profit-oriented entities that comply with NZ IFRS 1 will simultaneously be in compliance with IFRS 1.
- IN11 Public benefit entities that have applied the New Zealand specific public benefit entity requirements or concessions and qualifying entities that have applied differential reporting concessions and that have not asserted compliance with NZ IFRSs will not necessarily be in compliance with IFRS 1. NZ IFRS 1 states that "An entity's first New Zealand equivalents to IFRSs financial statements are the first annual financial statements in which the entity adopts NZ IFRSs by an explicit and unreserved statement in those financial statements of compliance with NZ IFRSs."

New Zealand Equivalent to International Financial Reporting Standard 1

First-time Adoption of International Financial Reporting Standards **(NZ IFRS 1)**

Objective

- 1 The objective of this NZ IFRS is to ensure that an entity's *first New Zealand equivalents to IFRSs financial statements*, and its interim financial reports for part of the period covered by those financial statements, contain high quality information that:
- (a) is transparent for users and comparable over all periods presented;
 - (b) provides a suitable starting point for accounting in accordance with *New Zealand equivalents to International Financial Reporting Standards* (NZ IFRSs); and
 - (c) can be generated at a cost that does not exceed the benefits.

Scope

- 2 An entity shall apply this NZ IFRS in:
- (a) its first New Zealand equivalents to IFRSs financial statements; and
 - (b) each interim financial report, if any, that it presents in accordance with NZ IAS 34 *Interim Financial Reporting* for part of the period covered by its first New Zealand equivalents to IFRSs financial statements.
- 3 An entity's first New Zealand equivalents to IFRSs financial statements are the first annual financial statements in which the entity adopts NZ IFRSs, by an explicit and unreserved statement in those financial statements of compliance with NZ IFRSs. Financial statements in accordance with NZ IFRSs are an entity's first New Zealand equivalents to IFRSs financial statements if, for example, the entity:
- (a) presented its most recent previous financial statements:
 - (i) in accordance with national requirements that are not consistent with NZ IFRSs in all respects;

NZ IFRS 1

- (ii) in conformity with NZ IFRSs in all respects, except that the financial statements did not contain an explicit and unreserved statement that they complied with NZ IFRSs;
 - (iii) containing an explicit statement of compliance with some, but not all, NZ IFRSs;
 - (iv) in accordance with national requirements inconsistent with NZ IFRSs, using some individual NZ IFRSs to account for items for which national requirements did not exist; or
 - (v) in accordance with national requirements, with a reconciliation of some amounts to the amounts determined in accordance with NZ IFRSs;
 - (b) prepared financial statements in accordance with NZ IFRSs for internal use only, without making them available to the entity's owners or any other external users;
 - (c) prepared a reporting package in accordance with NZ IFRSs for consolidation purposes without preparing a complete set of financial statements as defined in NZ IAS 1 *Presentation of Financial Statements* (as revised in 2007); or
 - (d) did not present financial statements for previous periods.
- 4 This NZ IFRS applies when an entity first adopts NZ IFRSs. It does not apply when, for example, an entity:
- (a) stops presenting financial statements in accordance with national requirements, having previously presented them as well as another set of financial statements that contained an explicit and unreserved statement of compliance with NZ IFRSs;
 - (b) presented financial statements in the previous year in accordance with national requirements and those financial statements contained an explicit and unreserved statement of compliance with NZ IFRSs; or
 - (c) presented financial statements in the previous year that contained an explicit and unreserved statement of compliance with NZ IFRSs, even if the auditors qualified their audit report on those financial statements.
- 5 This NZ IFRS does not apply to changes in accounting policies made by an entity that already applies NZ IFRSs. Such changes are the subject of:
- (a) requirements on changes in accounting policies in NZ IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*; and
 - (b) specific transitional requirements in other NZ IFRSs.

Qualifying Entities

NZ 5.1 In applying this Standard a qualifying entity shall read all references to “NZ IFRSs” as references to “NZ IFRSs including, where applicable, differential reporting concessions”.

NZ 5.2 Entities which qualify for differential reporting concessions in accordance with the *Framework for Differential Reporting for Entities Applying the New Zealand Equivalents to International Financial Reporting Standards Reporting Regime (2005)* are not required to provide a statement of financial position as at the beginning of the earliest comparative period in accordance with paragraph 21.

Recognition and measurement**Opening New Zealand equivalents to IFRSs statement of financial position**

- 6 An entity shall prepare and present an *opening New Zealand equivalents to IFRSs statement of financial position* at the *date of transition to NZ IFRSs*. This is the starting point for its accounting in accordance with NZ IFRSs.

Accounting policies

- 7 An entity shall use the same accounting policies in its opening New Zealand equivalents to IFRSs statement of financial position and throughout all periods presented in its first New Zealand equivalents to IFRSs financial statements. Those accounting policies shall comply with each NZ IFRS effective at the end of its first NZ IFRSs reporting period, except as specified in paragraphs 13–19 and Appendices B–E.
- 8 An entity shall not apply different versions of NZ IFRSs that were effective at earlier dates. An entity may apply a new NZ IFRS that is not yet mandatory if that NZ IFRS permits early application.

Example: Consistent application of latest version of NZ IFRSs**Background**

The end of entity A’s first NZ IFRSs reporting period is 31 December 20X5. Entity A decides to present comparative information in those financial statements for one year only (see paragraph 21). Therefore, its date of transition to NZ IFRSs is the beginning of business on 1 January 20X4 (or, equivalently, close of business on 31 December 20X3). Entity A presented financial statements in accordance with its previous GAAP annually to 31 December each year up to, and including, 31 December 20X4.

continued...

...continued

Application of requirements

Entity A is required to apply the NZ IFRSs effective for periods ending on 31 December 20X5 in:

- (a) preparing and presenting its opening New Zealand equivalents to IFRSs statement of financial position at 1 January 20X4; and
- (b) preparing and presenting its statement of financial position for 31 December 20X5 (including comparative amounts for 20X4), statement of comprehensive income, statement of changes in equity and statement of cash flows for the year to 31 December 20X5 (including comparative amounts for 20X4) and disclosures (including comparative information for 20X4).

If a new New Zealand equivalent to an IFRS is not yet mandatory but permits early application, entity A is permitted, but not required, to apply that NZ IFRS in its first New Zealand equivalents to IFRSs financial statements.

- 9 The transitional provisions in other NZ IFRSs apply to changes in accounting policies made by an entity that already uses NZ IFRSs; they do not apply to a *first-time adopter's* transition to NZ IFRSs, except as specified in Appendices B–E.
- 10 Except as described in paragraphs 13–19 and Appendices B–E, an entity shall, in its opening New Zealand equivalents to IFRSs statement of financial position:
 - (a) recognise all assets and liabilities whose recognition is required by NZ IFRSs;
 - (b) not recognise items as assets or liabilities if NZ IFRSs do not permit such recognition;
 - (c) reclassify items that it recognised in accordance with previous GAAP as one type of asset, liability or component of equity, but are a different type of asset, liability or component of equity in accordance with NZ IFRSs; and
 - (d) apply NZ IFRSs in measuring all recognised assets and liabilities.
- 11 The accounting policies that an entity uses in its opening New Zealand equivalents to IFRSs statement of financial position may differ from those that it used for the same date using its previous GAAP. The resulting adjustments arise from events and transactions before the date of transition to NZ IFRSs. Therefore, an entity shall recognise those adjustments directly in retained earnings (or, if appropriate, another category of equity) at the date of transition to NZ IFRSs.
- 12 This Standard establishes two categories of exceptions to the principle that an entity's opening New Zealand equivalents to IFRSs statement of financial position shall comply with each NZ IFRS:
 - (a) Paragraphs 14–17 and Appendix B prohibit retrospective application of some aspects of other NZ IFRSs.
 - (b) Appendices C–E grant exemptions from some requirements of other NZ IFRSs.

Exceptions to the retrospective application of other NZ IFRSs

- 13 This Standard prohibits retrospective application of some aspects of other NZ IFRSs. These exceptions are set out in paragraphs 14–17 and Appendix B.

Estimates

- 14 **An entity's estimates in accordance with NZ IFRSs at the date of transition to NZ IFRSs shall be consistent with estimates made for the same date in accordance with previous GAAP (after adjustments to reflect any difference in accounting policies), unless there is objective evidence that those estimates were in error.**
- 15 An entity may receive information after the date of transition to NZ IFRSs about estimates that it had made under previous GAAP. In accordance with paragraph 14, an entity shall treat the receipt of that information in the same way as non-adjusting events after the reporting period in accordance with NZ IAS 10 *Events after the Reporting Period*. For example, assume that an entity's date of transition to NZ IFRSs is 1 January 20X4 and new information on 15 July 20X4 requires the revision of an estimate made in accordance with previous GAAP at 31 December 20X3. The entity shall not reflect that new information in its opening NZ IFRSs statement of financial position (unless the estimates need adjustment for any differences in accounting policies or there is objective evidence that the estimates were in error). Instead, the entity shall reflect that new information in profit or loss (or, if appropriate, other comprehensive income) for the year ended 31 December 20X4.
- 16 An entity may need to make estimates in accordance with NZ IFRSs at the date of transition to NZ IFRSs that were not required at that date under previous GAAP. To achieve consistency with NZ IAS 10, those estimates in accordance with NZ IFRSs shall reflect conditions that existed at the date of transition to NZ IFRSs. In particular, estimates at the date of transition to NZ IFRSs of market prices, interest rates or foreign exchange rates shall reflect market conditions at that date.
- 17 Paragraphs 14–16 apply to the opening New Zealand equivalents to IFRSs statement of financial position. They also apply to a comparative period presented in an entity's first New Zealand equivalents to IFRSs financial statements, in which case the references to the date of transition to NZ IFRSs are replaced by references to the end of that comparative period.

Exemptions from other NZ IFRSs

- 18 An entity may elect to use one or more of the exemptions contained in Appendices C–E. An entity shall not apply these exemptions by analogy to other items.

NZ IFRS 1

- 19 Some exemptions in Appendices C–E refer to *fair value*. In determining fair values in accordance with this NZ IFRS, an entity shall apply the definition of fair value in Appendix A and any more specific guidance in other NZ IFRSs on the determination of fair values for the asset or liability in question. Those fair values shall reflect conditions that existed at the date for which they were determined.

Presentation and disclosure

- 20 This Standard does not provide exemptions from the presentation and disclosure requirements in other NZ IFRSs.

Comparative information

- 21 To comply with NZ IAS 1, an entity's first New Zealand equivalents to IFRSs financial statements shall include at least three* statements of financial position, two statements of comprehensive income, two separate income statements (if presented), two statements of cash flows and two statements of changes in equity and related notes, including comparative information.

Non-NZ IFRS comparative information and historical summaries

- 22 Some entities present historical summaries of selected data for periods before the first period for which they present full comparative information in accordance with NZ IFRSs. This Standard does not require such summaries to comply with the recognition and measurement requirements of NZ IFRSs. Furthermore, some entities present comparative information in accordance with previous GAAP as well as the comparative information required by NZ IAS 1. In any financial statements containing historical summaries or comparative information in accordance with previous GAAP, an entity shall:
- (a) label the previous GAAP information prominently as not being prepared in accordance with NZ IFRSs; and
 - (b) disclose the nature of the main adjustments that would make it comply with NZ IFRSs. An entity need not quantify those adjustments.

* Entities which qualify for differential reporting concessions in accordance with the *Framework for Differential Reporting for Entities Applying the New Zealand Equivalents to International Financial Reporting Standards Regime* (2005) are not required to provide a statement of financial position as at the beginning of the earliest comparative period.

Explanation of transition to NZ IFRSs

- 23 **An entity shall explain how the transition from previous GAAP to NZ IFRSs affected its reported financial position, financial performance and cash flows.**

Reconciliations

- 24 To comply with paragraph 23, an entity's first New Zealand equivalents to IFRSs financial statements shall include:
- (a) reconciliations of its equity reported in accordance with previous GAAP to its equity in accordance with NZ IFRSs for both of the following dates:
 - (i) the date of transition to NZ IFRSs; and
 - (ii) the end of the latest period presented in the entity's most recent annual financial statements in accordance with previous GAAP.
 - (b) a reconciliation to its total comprehensive income in accordance with NZ IFRSs for the latest period in the entity's most recent annual financial statements. The starting point for that reconciliation shall be total comprehensive income in accordance with previous GAAP for the same period or, if an entity did not report such a total, profit or loss under previous GAAP.
 - (c) if the entity recognised or reversed any impairment losses for the first-time in preparing its opening New Zealand equivalents to IFRSs statement of financial position, the disclosures that NZ IAS 36 *Impairment of Assets* would have required if the entity had recognised those impairment losses or reversals in the period beginning with the date of transition to NZ IFRSs.
- 25 The reconciliations required by paragraph 24(a) and (b) shall give sufficient detail to enable users to understand the material adjustments to the statement of financial position and statement of comprehensive income. If an entity presented a statement of cash flows under its previous GAAP, it shall also explain the material adjustments to the statement of cash flows.
- 26 If an entity becomes aware of errors made under previous GAAP, the reconciliations required by paragraphs 24(a) and (b) shall distinguish the correction of those errors from changes in accounting policies.
- 27 NZ IAS 8 does not apply to the changes in accounting policies an entity makes when it adopts NZ IFRSs or to changes in those policies until after it presents its first New Zealand equivalents to IFRSs financial statements. Therefore, NZ IAS 8's requirements for disclosures about changes in accounting policies do not apply in an entity's first New Zealand equivalents to IFRSs financial statements.
- 27A If during the period covered by its first New Zealand equivalents to IFRSs financial statements an entity changes its accounting policies or its use of the

NZ IFRS 1

exemptions contained in this NZ IFRS, it shall explain the changes between its first NZ IFRS interim financial report and its first NZ IFRS financial statements, in accordance with paragraph 23, and it shall update the reconciliations required by paragraph 24(a) and (b).

- 28 If an entity did not present financial statements for previous periods, its first New Zealand equivalents to IFRSs financial statements shall disclose that fact.

Designation of financial assets or financial liabilities

- 29 An entity is permitted to designate a previously recognised financial asset or financial liability as a financial asset or financial liability at fair value through profit or loss or a financial asset as available for sale in accordance with paragraph D19. The entity shall disclose the fair value of financial assets or financial liabilities designated into each category at the date of designation and their classification and carrying amount in the previous financial statements.

Use of fair value as deemed cost

- 30 If an entity uses fair value in its opening New Zealand equivalents to IFRSs statement of financial position as *deemed cost* for an item of property, plant and equipment, an investment property or an intangible asset (see paragraphs D5 and D7), the entity's first New Zealand equivalents to IFRSs financial statements shall disclose, for each line item in the opening New Zealand equivalents to IFRSs statement of financial position:
- (a) the aggregate of those fair values; and
 - (b) the aggregate adjustment to the carrying amounts reported under previous GAAP.

Use of deemed cost for investments in subsidiaries, jointly controlled entities and associates

- 31 Similarly, if an entity uses a deemed cost in its opening New Zealand equivalents to IFRSs statement of financial position for an investment in a subsidiary, jointly controlled entity or associate in its separate financial statements (see paragraph D15), the entity's first NZ IFRSs separate financial statements shall disclose:
- (a) the aggregate deemed cost of those investments for which deemed cost is their previous GAAP carrying amount;
 - (b) the aggregate deemed cost of those investments for which deemed cost is fair value; and
 - (c) the aggregate adjustment to the carrying amounts reported under previous GAAP.

Use of deemed cost for oil and gas assets

- 31A If an entity uses the exemption in paragraph D8A(b) for oil and gas assets, it shall disclose that fact and the basis on which carrying amounts determined under previous GAAP were allocated.

Use of deemed cost for operations subject to rate regulation

- 31B If an entity uses the exemption in paragraph D8B for operations subject to rate regulation, it shall disclose that fact and the basis on which carrying amounts were determined under previous GAAP.

Interim financial reports

- 32 To comply with paragraph 23, if an entity presents an interim financial report in accordance with NZ IAS 34 for part of the period covered by its first New Zealand equivalents to IFRSs financial statements, the entity shall satisfy the following requirements in addition to the requirements of NZ IAS 34:
- (a) Each such interim financial report shall, if the entity presented an interim financial report for the comparable interim period of the immediately preceding financial year, include:
 - (i) a reconciliation of its equity in accordance with previous GAAP at the end of that comparable interim period to its equity under NZ IFRSs at that date; and
 - (ii) a reconciliation to its total comprehensive income in accordance with NZ IFRSs for that comparable interim period (current and year to date). The starting point for that reconciliation shall be total comprehensive income in accordance with previous GAAP for that period or, if an entity did not report such a total, profit or loss in accordance with previous GAAP.
 - (b) In addition to the reconciliations required by (a), an entity's first interim financial report in accordance with NZ IAS 34 for part of the period covered by its first New Zealand equivalents to IFRSs financial statements shall include the reconciliations described in paragraph 24(a) and (b) (supplemented by the details required by paragraphs 25 and 26) or a cross reference to another published document that includes these reconciliations.
 - (c) If an entity changes its accounting policies or its use of the exemptions contained in this NZ IFRS, it shall explain the changes in each such interim financial report in accordance with paragraph 23 and update the reconciliations required by (a) and (b).

NZ IFRS 1

- 33 NZ IAS 34 requires minimum disclosures, which are based on the assumption that users of the interim financial report also have access to the most recent annual financial statements. However, NZ IAS 34 also requires an entity to disclose 'any events or transactions that are material to an understanding of the current interim period'. Therefore, if a first-time adopter did not, in its most recent annual financial statements in accordance with previous GAAP, disclose information material to an understanding of the current interim period, its interim financial report shall disclose that information or include a cross-reference to another published document that includes it.

Effective date

- 34 An entity shall apply this NZ IFRS if its first New Zealand equivalents to IFRSs financial statements are for a period beginning on or after 1 July 2009. Earlier application is permitted.
- 35 An entity shall apply the amendments in paragraphs D1(n) and D23 for annual periods beginning on or after 1 July 2009. If an entity applies NZ IAS 23 *Borrowing Costs* (as revised in 2007) for an earlier period, those amendments shall be applied for that earlier period.
- 36 NZ IFRS 3 *Business Combinations* (as revised in 2008) amended paragraphs 19, C1 and C4(f) and (g). An entity shall apply those amendments for annual periods beginning on or after 1 July 2009. If an entity applies NZ IFRS 3 (revised 2008) for an earlier period, the amendments shall also be applied for that earlier period.
- 37 NZ IAS 27 *Consolidated and Separate Financial Statements* (as amended in 2008) amended paragraphs B1 and B7. An entity shall apply those amendments for annual periods beginning on or after 1 July 2009. If an entity applies NZ IAS 27 (amended 2008) for an earlier period, the amendments shall be applied for that earlier period.
- 38 *Cost of an Investment in a Subsidiary, Jointly Controlled Entity or Associate* (Amendments to NZ IFRS 1 and NZ IAS 27), issued in June 2008, added paragraphs 31, D1(g), D14 and D15. An entity shall apply those paragraphs for annual periods beginning on or after 1 January 2009. Earlier application is permitted. If an entity applies the paragraphs for an earlier period, it shall disclose that fact.
- 39 Paragraph B7 was amended by *Improvements to NZ IFRSs* issued in June 2008. An entity shall apply those amendments for annual periods beginning on or after 1 July 2009. If an entity applies NZ IAS 27 (amended 2008) for an earlier period, the amendments shall be applied for that earlier period.
- 39A *Additional Exemptions for First-time Adopters* (Amendments to NZ IFRS 1), issued in August 2009, added paragraphs 31A, D8A, D9A and D21A and amended paragraph D1(c), (d) and (l). An entity shall apply those amendments for annual periods beginning on or after 1 January 2010. Earlier application is

permitted. If an entity applies the amendments for an earlier period it shall disclose that fact.

- 39C NZ IFRIC 19 *Extinguishing Financial Liabilities with Equity Instruments* added paragraph D25. An entity shall apply that amendment when it applies NZ IFRIC 19.
- 39D *Limited Exemption from Comparative NZ IFRS 7 Disclosures for First-time Adopters* (Amendment to NZ IFRS 1), issued in March 2010, added paragraph E3. An entity shall apply that amendment for annual periods beginning on or after 1 July 2010. Earlier application is permitted. If an entity applies the amendment for an earlier period, it shall disclose that fact.
- 39E *Improvements to NZ IFRSs* issued in July 2010 added paragraphs 27A, 31B and D8B and amended paragraphs 27, 32, D1(c) and D8. An entity shall apply those amendments for annual periods beginning on or after 1 January 2011. Earlier application is permitted. If an entity applies the amendments for an earlier period it shall disclose that fact. Entities that adopted NZ IFRSs in periods before the effective date of NZ IFRS 1 or applied NZ IFRS 1 in a previous period are permitted to apply the amendment to paragraph D8 retrospectively in the first annual period after the amendment is effective. An entity applying paragraph D8 retrospectively shall disclose that fact.

Withdrawal of NZ IFRS 1 (issued 2004)

- 40 This Standard supersedes NZ IFRS 1 (issued in 2004 and amended in 2008).

Appendix A Defined terms

This appendix is an integral part of the NZ IFRS.

date of transition to New Zealand equivalents to IFRSs	The beginning of the earliest period for which an entity presents full comparative information under New Zealand equivalents to IFRSs in its first New Zealand equivalents to IFRSs financial statements .
deemed cost	An amount used as a surrogate for cost or depreciated cost at a given date. Subsequent depreciation or amortisation assumes that the entity had initially recognised the asset or liability at the given date and that its cost was equal to the deemed cost.
fair value	The amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.
first New Zealand equivalents to IFRSs financial statements	The first annual financial statements in which an entity adopts New Zealand equivalents to International Financial Reporting Standards (NZ IFRSs) , by an explicit and unreserved statement of compliance with New Zealand equivalents to IFRSs.
first New Zealand IFRSs reporting period	The latest reporting period covered by an entity's first New Zealand equivalents to IFRSs financial statements.
first-time adopter	An entity that presents its first New Zealand equivalents to IFRS financial statements .
International Financial Reporting Standards (IFRSs)	Standards and Interpretations adopted by the International Accounting Standards Board (IASB). They comprise: <ul style="list-style-type: none">(a) International Financial Reporting Standards;(b) International Accounting Standards; and(c) Interpretations developed by the International Financial Reporting Interpretations Committee (IFRIC) or the former Standing Interpretations Committee (SIC).

New Zealand equivalents to IFRSs (NZ IFRSs)	Standards and Interpretations approved by the Accounting Standards Review Board (ASRB) comprising New Zealand equivalents to: <ul style="list-style-type: none"> (a) International Financial Reporting Standards; (b) International Accounting Standards; and (c) International Interpretations.
opening New Zealand equivalents to IFRSs statement of financial position	An entity's statement of financial position at the date of transition to New Zealand equivalents to IFRSs .
previous GAAP	The basis of accounting that a first-time adopter used immediately before adopting New Zealand equivalents to IFRSs.
public benefit entities	Reporting entities whose primary objective is to provide goods or services for community or social benefit and where any equity has been provided with a view to supporting that primary objective rather than for a financial return to equity holders.
qualifying entities	Entities which meet the requirements of the Framework for Differential Reporting for Entities Applying the New Zealand Equivalents to International Financial Reporting Standards Reporting Regime to qualify for differential reporting concessions in standards.

Appendix B

Exceptions to the retrospective application of other NZ IFRSs

This appendix is an integral part of the NZ IFRS.

- B1 An entity shall apply the following exceptions:
- (a) derecognition of financial assets and financial liabilities (paragraphs B2 and B3);
 - (b) hedge accounting (paragraphs B4–B6); and
 - (c) non-controlling interests (paragraph B7).

Derecognition of financial assets and financial liabilities

- B2 Except as permitted by paragraph B3, a first-time adopter shall apply the derecognition requirements in NZ IAS 39 *Financial Instruments: Recognition and Measurement* prospectively for transactions occurring on or after 1 January 2004. In other words, if a first-time adopter derecognised non-derivative financial assets or non-derivative financial liabilities in accordance with its previous GAAP as a result of a transaction that occurred before 1 January 2004, it shall not recognise those assets and liabilities in accordance with NZ IFRSs (unless they qualify for recognition as a result of a later transaction or event).
- B3 Notwithstanding paragraph B2, an entity may apply the derecognition requirements in NZ IAS 39 retrospectively from a date of the entity's choosing, provided that the information needed to apply NZ IAS 39 to financial assets and financial liabilities derecognised as a result of past transactions was obtained at the time of initially accounting for those transactions.

Hedge accounting

- B4 As required by NZ IAS 39, at the date of transition to NZ IFRSs, an entity shall:
- (a) measure all derivatives at fair value; and
 - (b) eliminate all deferred losses and gains arising on derivatives that were reported in accordance with previous GAAP as if they were assets or liabilities.

- B5 An entity shall not reflect in its opening New Zealand equivalents to IFRSs statement of financial position a hedging relationship of a type that does not qualify for hedge accounting in accordance with NZ IAS 39 (for example, many hedging relationships where the hedging instrument is a cash instrument or written option; or where the hedged instrument is a net position). However, if an entity designated a net position as a hedged item in accordance with previous GAAP, it may designate an individual item within that net position as a hedged item in accordance with NZ IFRSs, provided that it does so no later than the date of transition to NZ IFRSs.
- B6 If, before the date of transition to NZ IFRSs, an entity had designated a transaction as a hedge but the hedge does not meet the conditions for hedge accounting in NZ IAS 39, the entity shall apply paragraphs 91 and 101 of NZ IAS 39 to discontinue hedge accounting. Transactions entered into before the date of transition to NZ IFRSs shall not be retrospectively designated as hedges.

Non-controlling interests

- B7 A first-time adopter shall apply the following requirements of NZ IAS 27 (as amended in 2008) prospectively from the date of transition to NZ IFRSs:
- (a) the requirement in paragraph 28 that total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance;
 - (b) the requirements in paragraphs 30 and 31 for accounting for changes in the parent's ownership interest in a subsidiary that do not result in a loss of control; and
 - (c) the requirements in paragraphs 34–37 for accounting for a loss of control over a subsidiary, and the related requirements of paragraph 8A of NZ IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations*.

However, if a first-time adopter elects to apply NZ IFRS 3 (as revised in 2008) retrospectively to past business combinations, it also shall apply NZ IAS 27 (as amended in 2008) in accordance with paragraph C1 of this NZ IFRS.

Appendix C

Exemptions for business combinations

This appendix is an integral part of the NZ IFRS. An entity shall apply the following requirements to business combinations that the entity recognised before the date of transition to NZ IFRSs.

- C1 A first-time adopter may elect not to apply NZ IFRS 3 (as revised in 2008) retrospectively to past business combinations (business combinations that occurred before the date of transition to NZ IFRSs). However, if a first-time adopter restates any business combination to comply with NZ IFRS 3 (as revised in 2008), it shall restate all later business combinations and shall also apply NZ IAS 27 (as amended in 2008) from that same date. For example, if a first-time adopter elects to restate a business combination that occurred on 30 June 20X6, it shall restate all business combinations that occurred between 30 June 20X6 and the date of transition to NZ IFRSs, and it shall also apply NZ IAS 27 (amended 2008) from 30 June 20X6.
- C2 An entity need not apply NZ IAS 21 *The Effects of Changes in Foreign Exchange Rates* retrospectively to fair value adjustments and goodwill arising in business combinations that occurred before the date of transition to NZ IFRSs. If the entity does not apply NZ IAS 21 retrospectively to those fair value adjustments and goodwill, it shall treat them as assets and liabilities of the entity rather than as assets and liabilities of the acquiree. Therefore, those goodwill and fair value adjustments either are already expressed in the entity's functional currency or are non-monetary foreign currency items, which are reported using the exchange rate applied in accordance with previous GAAP.
- C3 An entity may apply NZ IAS 21 retrospectively to fair value adjustments and goodwill arising in either:
- (a) all business combinations that occurred before the date of transition to NZ IFRSs; or
 - (b) all business combinations that the entity elects to restate to comply with NZ IFRS 3, as permitted by paragraph C1 above.
- C4 If a first-time adopter does not apply NZ IFRS 3 retrospectively to a past business combination, this has the following consequences for that business combination:
- (a) The first-time adopter shall keep the same classification (as an acquisition by the legal acquirer, a reverse acquisition by the legal acquiree, or a uniting of interests) as in its previous GAAP financial statements.

- (b) The first-time adopter shall recognise all its assets and liabilities at the date of transition to NZ IFRSs that were acquired or assumed in a past business combination, other than:
- (i) some financial assets and financial liabilities derecognised in accordance with previous GAAP (see paragraph B2); and
 - (ii) assets, including goodwill, and liabilities that were not recognised in the acquirer's consolidated statement of financial position in accordance with previous GAAP and also would not qualify for recognition in accordance with NZ IFRSs in the separate statement of financial position of the acquiree (see (f)–(i) below).

The first-time adopter shall recognise any resulting change by adjusting retained earnings (or, if appropriate, another category of equity), unless the change results from the recognition of an intangible asset that was previously subsumed within goodwill (see (g)(i) below).

- (c) The first-time adopter shall exclude from its opening New Zealand equivalents to IFRSs statement of financial position any item recognised in accordance with previous GAAP that does not qualify for recognition as an asset or liability under NZ IFRSs. The first-time adopter shall account for the resulting change as follows:
- (i) the first-time adopter may have classified a past business combination as an acquisition and recognised as an intangible asset an item that does not qualify for recognition as an asset in accordance with NZ IAS 38 *Intangible Assets*. It shall reclassify that item (and, if any, the related deferred tax and non-controlling interests) as part of goodwill (unless it deducted goodwill directly from equity in accordance with previous GAAP, see (g)(i) and (i) below).
 - (ii) the first-time adopter shall recognise all other resulting changes in retained earnings.
- (d) NZ IFRSs require subsequent measurement of some assets and liabilities on a basis that is not based on original cost, such as fair value. The first-time adopter shall measure these assets and liabilities on that basis in its opening New Zealand equivalents to IFRSs statement of financial position, even if they were acquired or assumed in a past business combination. It shall recognise any resulting change in the carrying amount by adjusting retained earnings (or, if appropriate, another category of equity), rather than goodwill.

* Such changes include reclassifications from or to intangible assets if goodwill was not recognised in accordance with previous GAAP as an asset. This arises if, in accordance with previous GAAP, the entity (a) deducted goodwill directly from equity or (b) did not treat the business combination as an acquisition.

NZ IFRS 1

- (e) Immediately after the business combination, the carrying amount in accordance with previous GAAP of assets acquired and liabilities assumed in that business combination shall be their deemed cost in accordance with NZ IFRSs at that date. If NZ IFRSs require a cost-based measurement of those assets and liabilities at a later date, that deemed cost shall be the basis for cost-based depreciation or amortisation from the date of the business combination.
- (f) If an asset acquired, or liability assumed, in a past business combination was not recognised in accordance with previous GAAP, it does not have a deemed cost of zero in the opening New Zealand equivalents to IFRSs statement of financial position. Instead, the acquirer shall recognise and measure it in its consolidated statement of financial position on the basis that NZ IFRSs would require in the statement of financial position of the acquiree. To illustrate: if the acquirer had not, in accordance with its previous GAAP, capitalised finance leases acquired in a past business combination, it shall capitalise those leases in its consolidated financial statements, as NZ IAS 17 *Leases* would require the acquiree to do in its New Zealand equivalents to IFRSs statement of financial position. Similarly, if the acquirer had not, in accordance with its previous GAAP, recognised a contingent liability that still exists at the date of transition to NZ IFRSs, the acquirer shall recognise that contingent liability at that date unless NZ IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* would prohibit its recognition in the financial statements of the acquiree. Conversely, if an asset or liability was subsumed in goodwill in accordance with previous GAAP but would have been recognised separately under NZ IFRS 3, that asset or liability remains in goodwill unless NZ IFRSs would require its recognition in the financial statements of the acquiree.
- (g) The carrying amount of goodwill in the opening New Zealand equivalents to IFRSs statement of financial position shall be its carrying amount in accordance with previous GAAP at the date of transition to NZ IFRSs, after the following two adjustments:
 - (i) If required by (c)(i) above, the first-time adopter shall increase the carrying amount of goodwill when it reclassifies an item that it recognised as an intangible asset in accordance with previous GAAP. Similarly, if (f) above requires the first-time adopter to recognise an intangible asset that was subsumed in recognised goodwill in accordance with previous GAAP, the first-time adopter shall decrease the carrying amount of goodwill accordingly (and, if applicable, adjust deferred tax and non-controlling interests).
 - (ii) Regardless of whether there is any indication that the goodwill may be impaired, the first-time adopter shall apply NZ IAS 36 in testing the goodwill for impairment at the date of transition to NZ IFRSs and in recognising any resulting impairment loss in retained earnings (or, if so

required by NZ IAS 36, in revaluation surplus). The impairment test shall be based on conditions at the date of transition to NZ IFRSs.

- (h) No other adjustments shall be made to the carrying amount of goodwill at the date of transition to NZ IFRSs. For example, the first-time adopter shall not restate the carrying amount of goodwill:
 - (i) to exclude in-process research and development acquired in that business combination (unless the related intangible asset would qualify for recognition in accordance with NZ IAS 38 in the statement of financial position of the acquiree);
 - (ii) to adjust previous amortisation of goodwill;
 - (iii) to reverse adjustments to goodwill that NZ IFRS 3 would not permit, but were made in accordance with previous GAAP because of adjustments to assets and liabilities between the date of the business combination and the date of transition to NZ IFRSs.
- (i) If the first-time adopter recognised goodwill in accordance with previous GAAP as a deduction from equity:
 - (i) it shall not recognise that goodwill in its opening New Zealand equivalents to IFRSs statement of financial position. Furthermore, it shall not reclassify that goodwill to profit or loss if it disposes of the subsidiary or if the investment in the subsidiary becomes impaired.
 - (ii) adjustments resulting from the subsequent resolution of a contingency affecting the purchase consideration shall be recognised in retained earnings.
- (j) In accordance with its previous GAAP, the first-time adopter may not have consolidated a subsidiary acquired in a past business combination (for example, because the parent did not regard it as a subsidiary in accordance with previous GAAP or did not prepare consolidated financial statements). The first-time adopter shall adjust the carrying amounts of the subsidiary's assets and liabilities to the amounts that NZ IFRSs would require in the subsidiary's statement of financial position. The deemed cost of goodwill equals the difference at the date of transition to NZ IFRSs between:
 - (i) the parent's interest in those adjusted carrying amounts; and
 - (ii) the cost in the parent's separate financial statements of its investment in the subsidiary.
- (k) The measurement of non-controlling interests and deferred tax follows from the measurement of other assets and liabilities. Therefore, the above adjustments to recognised assets and liabilities affect non-controlling interests and deferred tax.

NZ IFRS 1

- C5 The exemption for past business combinations also applies to past acquisitions of investments in associates and of interests in joint ventures. Furthermore, the date selected for paragraph C1 applies equally for all such acquisitions.

Appendix D

Exemptions from other NZ IFRSs

This appendix is an integral part of the NZ IFRS.

- D1 An entity may elect to use one or more of the following exemptions:
- (a) share-based payment transactions (paragraphs D2 and D3);
 - (b) insurance contracts (paragraph D4);
 - (c) deemed cost (paragraphs D5–D8B);
 - (d) leases (paragraphs D9 and D9A);
 - (e) employee benefits (paragraphs D10 and D11);
 - (f) cumulative translation differences (paragraphs D12 and D13);
 - (g) investments in subsidiaries, jointly controlled entities and associates (paragraphs D14 and D15);
 - (h) assets and liabilities of subsidiaries, associates and joint ventures (paragraphs D16 and D17);
 - (i) compound financial instruments (paragraph D18);
 - (j) designation of previously recognised financial instruments (paragraph D19–D19C);
 - (k) fair value measurement of financial assets or financial liabilities at initial recognition (paragraph D20);
 - (l) decommissioning liabilities included in the cost of property, plant and equipment (paragraphs D21 and D21A);
 - (m) financial assets or intangible assets accounted for in accordance with IFRIC 12 *Service Concession Arrangements* (paragraph D22);
 - (n) borrowing costs (paragraph D23);
 - (o) transfers of assets from customers (paragraph D24); and
 - (p) extinguishing financial liabilities with equity instruments (paragraph D25).

An entity shall not apply these exemptions by analogy to other items.

Share-based payment transactions

- D2 A first-time adopter is encouraged, but not required, to apply NZ IFRS 2 *Share-based Payment* to equity instruments that were granted on or before 7 November 2002. A first-time adopter is also encouraged, but not required, to apply NZ IFRS 2 to equity instruments that were granted after 7 November 2002 and vested before the later of (a) the date of transition to NZ IFRSs and (b) 1 January 2005. However, if a first-time adopter elects to apply NZ IFRS 2 to such equity instruments, it may do so only if the entity has disclosed publicly the fair value of those equity instruments, determined at the measurement date, as defined in NZ IFRS 2. For all grants of equity instruments to which NZ IFRS 2 has not been applied (eg equity instruments granted on or before 7 November 2002), a first-time adopter shall nevertheless disclose the information required by paragraphs 44 and 45 of NZ IFRS 2. If a first-time adopter modifies the terms or conditions of a grant of equity instruments to which NZ IFRS 2 has not been applied, the entity is not required to apply paragraphs 26–29 of NZ IFRS 2 if the modification occurred before the date of transition to NZ IFRSs.
- D3 A first-time adopter is encouraged, but not required, to apply NZ IFRS 2 to liabilities arising from share-based payment transactions that were settled before the date of transition to NZ IFRSs. A first-time adopter is also encouraged, but not required, to apply NZ IFRS 2 to liabilities that were settled before 1 January 2005. For liabilities to which NZ IFRS 2 is applied, a first-time adopter is not required to restate comparative information to the extent that the information relates to a period or date that is earlier than 7 November 2002.

Insurance contracts

- D4 A first-time adopter may apply the transitional provisions in NZ IFRS 4 *Insurance Contracts*. NZ IFRS 4 restricts changes in accounting policies for insurance contracts, including changes made by a first-time adopter.

Deemed cost

- D5 An entity may elect to measure an item of property, plant and equipment at the date of transition to NZ IFRSs at its fair value and use that fair value as its deemed cost at that date.
- D6 A first-time adopter may elect to use a previous GAAP revaluation of an item of property, plant and equipment at, or before, the date of transition to NZ IFRSs as deemed cost at the date of the revaluation, if the revaluation was, at the date of the revaluation, broadly comparable to:
- (a) fair value; or

- (b) cost or depreciated cost in accordance with NZ IFRSs, adjusted to reflect, for example, changes in a general or specific price index.

D7 The elections in paragraphs D5 and D6 are also available for:

- (a) investment property, if an entity elects to use the cost model in NZ IAS 40 *Investment Property*; and
- (b) intangible assets that meet:
 - (i) the recognition criteria in NZ IAS 38 (including reliable measurement of original cost); and
 - (ii) the criteria in NZ IAS 38 for revaluation (including the existence of an active market).

An entity shall not use these elections for other assets or for liabilities.

D8 A first-time adopter may have established a deemed cost in accordance with previous GAAP for some or all of its assets and liabilities by measuring them at their fair value at one particular date because of an event such as a privatisation or initial public offering.

- (a) If the measurement date is *at or before* the date of transition to NZ IFRSs, the entity may use such event-driven fair value measurements as deemed cost for NZ IFRSs at the date of that measurement.
- (b) If the measurement date is *after* the date of transition to NZ IFRSs, but during the period covered by the first New Zealand equivalents to IFRSs financial statements, the event-driven fair value measurements may be used as deemed cost when the event occurs. An entity shall recognise the resulting adjustments directly in retained earnings (or if appropriate, another category of equity) at the measurement date. At the date of transition to NZ IFRSs, the entity shall either establish the deemed cost by applying the criteria in paragraphs D5–D7 or measure assets and liabilities in accordance with the other requirements in this NZ IFRS.

D8A Under some national accounting requirements exploration and development costs for oil and gas properties in the development or production phases are accounted for in cost centres that include all properties in a large geographical area. A first-time adopter using such accounting under previous GAAP may elect to measure oil and gas assets at the date of transition to NZ IFRSs on the following basis:

- (a) exploration and evaluation assets at the amount determined under the entity's previous GAAP; and
- (b) assets in the development or production phases at the amount determined for the cost centre under the entity's previous GAAP. The entity shall allocate this

NZ IFRS 1

amount to the cost centre's underlying assets pro rata using reserve volumes or reserve values as of that date.

The entity shall test exploration and evaluation assets and assets in the development and production phases for impairment at the date of transition to NZ IFRSs in accordance with NZ IFRS 6 *Exploration for and Evaluation of Mineral Resources* or NZ IAS 36 respectively and, if necessary, reduce the amount determined in accordance with (a) or (b) above. For the purposes of this paragraph, oil and gas assets comprise only those assets used in the exploration, evaluation, development or production of oil and gas.

- D8B Some entities hold items of property, plant and equipment or intangible assets that are used, or were previously used, in operations subject to rate regulation. The carrying amount of such items might include amounts that were determined under previous GAAP but do not qualify for capitalisation in accordance with NZ IFRSs. If this is the case, a first-time adopter may elect to use the previous GAAP carrying amount of such an item at the date of transition to NZ IFRSs as deemed cost. If an entity applies this exemption to an item, it need not apply it to all items. At the date of transition to NZ IFRSs, an entity shall test for impairment in accordance with NZ IAS 36 each item for which this exemption is used. For the purposes of this paragraph, operations are subject to rate regulation if they provide goods or services to customers at prices (ie rates) established by an authorised body empowered to establish rates that bind the customers and that are designed to recover the specific costs the entity incurs in providing the regulated goods or services and to earn a specified return. The specified return could be a minimum or range and need not be a fixed or guaranteed return.

Leases

- D9 A first-time adopter may apply the transitional provisions in NZ IFRIC 4 *Determining whether an Arrangement contains a Lease*. Therefore, a first-time adopter may determine whether an arrangement existing at the date of transition to NZ IFRSs contains a lease on the basis of facts and circumstances existing at that date.
- D9A If a first-time adopter made the same determination of whether an arrangement contained a lease in accordance with previous GAAP as that required by NZ IFRIC 4 but at a date other than that required by NZ IFRIC 4, the first-time adopter need not reassess that determination when it adopts NZ IFRSs. For an entity to have made the same determination of whether the arrangement contained a lease in accordance with previous GAAP, that determination would have to have given the same outcome as that resulting from applying NZ IAS 17 *Leases* and NZ IFRIC 4.

Employee benefits

- D10 In accordance with NZ IAS 19 *Employee Benefits*, an entity may elect to use a 'corridor' approach that leaves some actuarial gains and losses unrecognised. Retrospective application of this approach requires an entity to split the cumulative actuarial gains and losses from the inception of the plan until the date of transition to NZ IFRSs into a recognised portion and an unrecognised portion. However, a first-time adopter may elect to recognise all cumulative actuarial gains and losses at the date of transition to NZ IFRSs, even if it uses the corridor approach for later actuarial gains and losses. If a first-time adopter uses this election, it shall apply it to all plans.
- D11 An entity may disclose the amounts required by paragraph 120A(p) of NZ IAS 19 as the amounts are determined for each accounting period prospectively from the date of transition to NZ IFRSs.

Cumulative translation differences

- D12 NZ IAS 21 requires an entity:
- (a) to recognise some translation differences in other comprehensive income and accumulate these in a separate component of equity; and
 - (b) on disposal of a foreign operation, to reclassify the cumulative translation difference for that foreign operation (including, if applicable, gains and losses on related hedges) from equity to profit or loss as part of the gain or loss on disposal.
- D13 However, a first-time adopter need not comply with these requirements for cumulative translation differences that existed at the date of transition to NZ IFRSs. If a first-time adopter uses this exemption:
- (a) the cumulative translation differences for all foreign operations are deemed to be zero at the date of transition to NZ IFRSs; and
 - (b) the gain or loss on a subsequent disposal of any foreign operation shall exclude translation differences that arose before the date of transition to NZ IFRSs and shall include later translation differences.

Investments in subsidiaries, jointly controlled entities and associates

- D14 When an entity prepares separate financial statements, NZ IAS 27 (as amended in 2008) requires it to account for its investments in subsidiaries, jointly controlled entities and associates either:
- (a) at cost; or
 - (b) in accordance with NZ IAS 39.
- D15 If a first-time adopter measures such an investment at cost in accordance with NZ IAS 27, it shall measure that investment at one of the following amounts in its separate opening New Zealand equivalents to IFRSs statement of financial position:
- (a) cost determined in accordance with NZ IAS 27; or
 - (b) deemed cost. The deemed cost of such an investment shall be its:
 - (i) fair value (determined in accordance with NZ IAS 39) at the entity's date of transition to NZ IFRSs in its separate financial statements; or
 - (ii) previous GAAP carrying amount at that date.
- A first-time adopter may choose either (i) or (ii) above to measure its investment in each subsidiary, jointly controlled entity or associate that it elects to measure using a deemed cost.

Assets and liabilities of subsidiaries, associates and joint ventures

- D16 If a subsidiary becomes a first-time adopter later than its parent, the subsidiary shall, in its financial statements, measure its assets and liabilities at either:
- (a) the carrying amounts that would be included in the parent's consolidated financial statements, based on the parent's date of transition to NZ IFRSs, if no adjustments were made for consolidation procedures and for the effects of the business combination in which the parent acquired the subsidiary; or
 - (b) the carrying amounts required by the rest of this NZ IFRS, based on the subsidiary's date of transition to NZ IFRSs. These carrying amounts could differ from those described in (a):
 - (i) when the exemptions in This Standard result in measurements that depend on the date of transition to NZ IFRSs.

- (ii) when the accounting policies used in the subsidiary's financial statements differ from those in the consolidated financial statements. For example, the subsidiary may use as its accounting policy the cost model in NZ IAS 16 *Property, Plant and Equipment*, whereas the group may use the revaluation model.

A similar election is available to an associate or joint venture that becomes a first-time adopter later than an entity that has significant influence or joint control over it.

- D17 However, if an entity becomes a first-time adopter later than its subsidiary (or associate or joint venture) the entity shall, in its consolidated financial statements, measure the assets and liabilities of the subsidiary (or associate or joint venture) at the same carrying amounts as in the financial statements of the subsidiary (or associate or joint venture), after adjusting for consolidation and equity accounting adjustments and for the effects of the business combination in which the entity acquired the subsidiary. Similarly, if a parent becomes a first-time adopter for its separate financial statements earlier or later than for its consolidated financial statements, it shall measure its assets and liabilities at the same amounts in both financial statements, except for consolidation adjustments.

Compound financial instruments

- D18 NZ IAS 32 *Financial Instruments: Presentation* requires an entity to split a compound financial instrument at inception into separate liability and equity components. If the liability component is no longer outstanding, retrospective application of NZ IAS 32 involves separating two portions of equity. The first portion is in retained earnings and represents the cumulative interest accreted on the liability component. The other portion represents the original equity component. However, in accordance with this NZ IFRS, a first-time adopter need not separate these two portions if the liability component is no longer outstanding at the date of transition to NZ IFRSs.

Designation of previously recognised financial instruments

- D19 NZ IAS 39 permits a financial asset to be designated on initial recognition as available for sale or a financial instrument (provided it meets certain criteria) to be designated as a financial asset or financial liability at fair value through profit or loss. Despite this requirement exceptions apply in the following circumstances:
- (a) an entity is permitted to make an available-for-sale designation at the date of transition to NZ IFRSs.

NZ IFRS 1

- (b) an entity is permitted to designate, at the date of transition to NZ IFRSs, any financial asset or financial liability as at fair value through profit or loss provided the asset or liability meets the criteria in paragraph 9(b)(i), 9(b)(ii) or 11A of NZ IAS 39 at that date.

Fair value measurement of financial assets or financial liabilities at initial recognition

- D20 Notwithstanding the requirements of paragraphs 7 and 9, an entity may apply the requirements in the last sentence of NZ IAS 39 paragraph AG76 and in paragraph AG76A, in either of the following ways:
- (a) prospectively to transactions entered into after 25 October 2002; or
 - (b) prospectively to transactions entered into after 1 January 2004.

Decommissioning liabilities included in the cost of property, plant and equipment

- D21 NZ IFRIC 1 *Changes in Existing Decommissioning, Restoration and Similar Liabilities* requires specified changes in a decommissioning, restoration or similar liability to be added to or deducted from the cost of the asset to which it relates; the adjusted depreciable amount of the asset is then depreciated prospectively over its remaining useful life. A first-time adopter need not comply with these requirements for changes in such liabilities that occurred before the date of transition to NZ IFRSs. If a first-time adopter uses this exemption, it shall:
- (a) measure the liability as at the date of transition to NZ IFRSs in accordance with NZ IAS 37;
 - (b) to the extent that the liability is within the scope of NZ IFRIC 1, estimate the amount that would have been included in the cost of the related asset when the liability first arose, by discounting the liability to that date using its best estimate of the historical risk-adjusted discount rate(s) that would have applied for that liability over the intervening period; and
 - (c) calculate the accumulated depreciation on that amount, as at the date of transition to NZ IFRSs, on the basis of the current estimate of the useful life of the asset, using the depreciation policy adopted by the entity in accordance with NZ IFRSs.
- D21A An entity that uses the exemption in paragraph D8A(b) (for oil and gas assets in the development or production phases accounted for in cost centres that include all

properties in a large geographical area under previous GAAP) shall, instead of applying paragraph D21 or NZ IFRIC 1:

- (a) measure decommissioning, restoration and similar liabilities as at the date of transition to IFRSs in accordance with NZ IAS 37; and
- (b) recognise directly in retained earnings any difference between that amount and the carrying amount of those liabilities at the date of transition to NZ IFRSs determined under the entity's previous GAAP.

Financial assets or intangible assets accounted for in accordance with NZ IFRIC 12

- D22 A first-time adopter may apply the transitional provisions in NZ IFRIC 12.

Borrowing costs

- D23 A first-time adopter may apply the transitional provisions set out in paragraphs 27 and 28 of NZ IAS 23, as revised in 2007. In those paragraphs references to the effective date shall be interpreted as 1 January 2009 or the date of transition to NZ IFRSs, whichever is later.

Transfers of assets from customers

- D24 A first-time adopter may apply the transitional provisions set out in paragraph 22 of NZ IFRIC 18 *Transfers of Assets from Customers*. In that paragraph, reference to the effective date shall be interpreted as 1 July 2009 or the date of transition to IFRSs, whichever is later. In addition, a first-time adopter may designate any date before the date of transition to IFRSs and apply NZ IFRIC 18 to all transfers of assets from customers received on or after that date.

Extinguishing financial liabilities with equity instruments

- D25 A first-time adopter may apply the transitional provisions in NZ IFRIC 19 *Extinguishing Financial Liabilities with Equity Instruments*.

NZ IFRS 1

Appendix E

Short-term exemptions from NZ IFRSs

This appendix is an integral part of the NZ IFRS.

Disclosures about financial instruments

E3 A first-time adopter may apply the transition provisions in paragraph 44G of NZ IFRS 7.*

* Paragraph E3 was added as a consequence of *Limited Exemption from Comparative NZ IFRS 7 Disclosures for First-time Adopters* (Amendment to NZ IFRS 1) issued in March 2010. To avoid the potential use of hindsight and to ensure that first-time adopters are not disadvantaged as compared with current NZ IFRS preparers, the Board decided that first-time adopters should be permitted to use the same transition provisions permitted for existing preparers of financial statements prepared in accordance with NZ IFRSs that are included in *Improving Disclosures about Financial Instruments* (Amendments to NZ IFRS 7).
